Software Engineering Undergraduate — DevOps & Application Development

Summary

Software Engineering undergraduate with experience in application development and emerging DevOps practices. Skilled in structured data workflows, system design, and deployment fundamentals.

Education

Manipal University Jaipur

2023 – 2027

B.Tech in Computer Software Engineering

Seth M. R. Jaipuria School, Lucknow

Class XII: 80.25% Class X: 91.20%

Experience

Intern, Lutherford – Voxa Studio

Sep 2025 – Dec 2025

- Contributed to 5+ client projects across development workflows
- Improved coordination through cross-functional collaboration
- Worked within structured, iterative environments

Projects

StrataDesk (Flutter)

- Built system for geological data visualization and management
- Designed structured data models and validation workflows
- Implemented persistence and efficient data handling

Watermarking CNN

- Developed CNN for image watermarking and detection
- Implemented preprocessing, training, and evaluation pipeline

Portfolio Website

- Designed and deployed responsive portfolio on GitHub Pages
- Optimized layout and performance for accessibility

Positions of Responsibility

Head of Coverage, Aperture MUJ

2025 – Present

- Led operations for 10+ events, managing 5–8 members
- Improved coordination between execution and post-production

Media EC (College Fest)

2025

Coordinated media execution across event verticals

Media CC (College Fest)

2024

Supported content production and event coverage workflows

Technical Skills

C++, Dart, Flutter, GitHub, Jira, Unity, Vuforia, Full-Stack Web Development

Certifications

Machine Learning – NPTEL

Agile – Coursera

Jira – Coursera

Full-Stack – Udemy

AR Apps – Udemy
